To Whom It May Concern

The Lavertys are one of a pioneering family of Mullumbimby and I have lived all my life in this district.

When we were building our feeding stalls near the Golf Course at Mullumbimby in the mid -1940s, we required a large amount of sand or other fill material for the foundations of our feeding stalls. We were able to obtain the fill we required from the sand mining company working between New Brighton and Wooyung.

I wish to have it made known that on many occasions, when I was driving along the beach, there were several places where the water flowed out to the ocean. At one point, it was quite a big stream and when I wished to travel across it my truck had to be towed through it.

Signed: 

Neil D. Laverty.
